

Product Data Sheet

GST

DESCRIPTION

GST is a stable, non-additive mineral gear lubricant for automotive uses such as spiral-bevel and worm gear axles and some manually operated transmissions operating under mild conditions.

APPLICATIONS

- Manual transmissions, differentials, spiral-bevel, rear axle assemblies, and some worm gear drives requiring straight mineral gear lubricant
- Primarily used where an extreme pressure type gear oil is not necessary or where high oil make-up rates do not justify the use of a premium quality lubricant

GRADES

SAE 90 and 140

QUALITY LEVEL

- API Service GL-1

AVAILABLE PACKAGES

- 200-liter drum
- 18-liter pail

TYPICAL CHARACTERISTICS

	90	140
Specific Gravity at 15.6°C	0.9807	1.0051
Flash Point, COC, °C	228	266
Color, Visual	Dark Green	Dark Green
Viscosity at 40°C, cSt	355.4	1124
Viscosity at 100°C, cSt	16.90	27.04
Viscosity Index	<0	<0
