

Product Data Sheet

MO

DESCRIPTION

MO is a cost effective, single-grade oil intended primarily for use in gasoline engines of passenger cars running in mild operating conditions. It can also be used for diesel engine applications.

PROPERTIES

- Protects engines against low temperature sludge formation and rust
- Provides satisfactory performance in either high speed, over-the-road or stop-and-go service due to good chemical stability
- Excellent detergency
- Low tendency to form carbon deposits

GRADES

- SAE 30 and 40

APPLICATIONS

- Gasoline and diesel engines of passenger cars
- Recommended only for short oil drain interval applications

QUALITY LEVEL

- API Service SD/CC

AVAILABLE PACKAGES

- 200-liter drum
- 18-liter pail
- 6 x 4 liters in carton
- 24 x 1 liter in carton

TYPICAL CHARACTERISTICS

	30	40
Specific Gravity at 15.6 °C	0.8894	0.8927
Flash Point, COC, °C	232	262
Color, ASTM	3.5	4.0
Viscosity at 40°C, cSt	95.30	133.8
Viscosity at 100°C, cSt	11.24	14.20
Viscosity Index	104	104
TBN, mg KOH/g	4.7	4.7
Pour Point, °C	-9	-6
