

PETROKOTE 392

DESCRIPTION

PETROKOTE 392 is a solvent-cut, oil-type rust preventive material containing a highly effective rust inhibitor.

PROPERTIES

- Intended for "light service" such as protection of parts stored indoors against ordinary conditions of moisture condensations due to occasional temperature and humidity changes
- Excellent penetrating fluid and is recommended for use on plain metallic surfaces or parts having pockets, holes, crevices, including anti-friction bearings, roller chains, thrust bearings and positive engaging clutches

APPLICATION

- By brush, swab, spray or slush to dry on clean and rust-free surfaces

TYPE

- Solvent-cut, oil type rust preventive oil

AVAILABLE PACKAGE

- 200-liter drum
- 18-liter pail

TYPICAL CHARACTERISTICS

Specific Gravity at 15.6°C	0.8199
Color, ASTM	1.0
Viscosity at 40°C, cSt	2.35
Flash Point, PM, °C,	60
Corrosion, Cu, 3 hrs. at 100 °C	1b
