

MIXED XYLENE

DESCRIPTION

MIXED XYLENE is a mixture of three aromatic hydrocarbon isomers closely related to benzene. It is a clear, colorless, sweet-smelling liquid that is very flammable. It is used as a solvent in the printing, rubber, and leather industries. It is also used as a thinner and solvent in paints and varnishes.

TYPE

- Aromatic solvent

AVAILABLE PACKAGES

- Bulk

TYPICAL CHARACTERISTICS

Appearance	Bright and Clear
Color, Platinum/Cobalt Scale	6
Density at 20°C, kg/m ³	867.4
Copper Corrosion at 100°C, 30 min	1a
Distillation Range, °C	
Initial Boiling Point (IBP)	139.4
Dry Point Temperature (DPT)	141.8
