

Product Data Sheet

AUTOKOTE

DESCRIPTION

AUTOKOTE is a strong, asphalt-based protective coating recommended for undercoating and rustproofing of cars and other transport vehicles.

PROPERTIES

- Contains corrosion inhibitors that provide high resistance to severe acidic and salty environment
- Provides a durable, rubberized film that shields metal surfaces against scraping of road sand and grit
- Resists peeling or flaking even under the most severe driving and weather conditions
- Contains neutral solvents for rapid drying
- Readily applied by brush or spray
- Does not need additional thinners or solvents

APPLICATION

- By brush or spray on clean and dry metal surface

TYPE

- Solvent-cutback and asphalt type

AVAILABLE PACKAGES

- 18-liter pail
- 4 x 4 liters in carton
